01 / FREE RESET

Before You Book That Craft Fair Booth

- A craft fair booth fee is due before you sell a single handmade product.
- Before signing a contract or sending a non-refundable deposit, run this quick mathematical reality check.
- This free 5-page worksheet gives handmade makers a fast formula to determine their break-even unit threshold.
- Know your numbers before you commit your inventory and weekend time.

KEY ACTION POINTS

- **FREE DECISION AID**
- **NEVER BOOK BLIND**
- **NO PURCHASE REQUIRED**

02 / THE 4 EXPENSES

The 4 Hidden Costs of Craft Markets

- Cost 1: Direct Booth Fee. Typically $100 to $400 for standard 10x10 outdoor/indoor spaces.
- Cost 2: Travel & Fuel. Mileage, bridge tolls, municipal parking, and vehicle loading time.
- Cost 3: Payment Processing. Credit card transaction fees (Square 2.6% + $0.10 per swipe) and cash bank floats.
- Cost 4: Consumable Display. Shopping bags, tissue paper, business cards, price tags, and booth lighting batteries.

KEY ACTION POINTS

- BOOTH EXPENSE
- TRAVEL & PARKING
- CARD SWIPE CHARGES
- PACKAGING & BAGS

03 / THE FORMULA

The 3-Minute Break-Even Formula

- Step A: Add all fixed event expenses (Booth + Travel + Display + Packaging) = Total Fixed Overhead ($F).
- Step B: Determine your Average Selling Price ($P) and your Average Unit Making Cost ($C).
- Step C: Calculate Unit Contribution Margin ($M = $P - $C).
- Step D: Break-Even Volume = Total Fixed Overhead divided by Contribution Margin ($F / $M).

KEY ACTION POINTS

- **F = TOTAL FIXED OVERHEAD**
- **M = PRICE - MAKING COST**
- **BREAK-EVEN = F / M**

04 / WORKED EXAMPLE

A Real Market Scenario: The $200 Booth

- Fictional Example: A handmade maker books a Saturday holiday market with a $200 booth fee.
- Fixed Expenses: $200 booth + $30 gas/parking + $25 bags = $255 Total Event Overhead.
- Product Economics: Average retail price is $25.00; materials and labor total $11.50. Margin is $13.50 per unit.
- Break-Even Math: $255 / $13.50 = 18.9. The maker must sell exactly 19 units just to cover expenses!

KEY ACTION POINTS

- **TOTAL OVERHEAD: $255**
- **UNIT MARGIN: $13.50**
- **MUST SELL 19 UNITS TO BREAK EVEN**

05 / UPGRADE PATH

Step Up to CraftMargin Studio

- Ready to price your full catalog across in-person craft fairs and Etsy with automated formulas?
- CraftMargin Studio is our complete interactive Excel system with multi-channel price modeling, Square fee calculators, and inventory planners.
- Get instant access to the full Excel tool and 10-page master guide here:
- **https://kindgridstudio.gumroad.com/l/craftmargin-handmade-pricing-studio**
- Built with care by KindGrid Studio for creative entrepreneurs.

KEY ACTION POINTS

- **COMPLETE EXCEL PRICING TOOL**
- **MULTI-CHANNEL COMPARISON**
- **INSTANT GUMROAD ACCESS**
